Small Wind- Solar Power Hybrid Energy solutions

for

Residential / Commercial / Industrial applications

- backed by German / Dutch excellence.

Your search for a reliable Wind - Solar hybrid system is over!

Spitzen Group; headquartered in Erlangen, Germany; the leaders in providing energy solutions is all set to provide you with high quality and performance small wind and solar – hybrid systems to suit your needs for residential, commercial, industrial and other applications. Spitzen Energy Solutions (India) based in Pune has a full-fledged operations with team of experts to assist you in assessing your needs and suggest the right solutions.

Spitzen with European reliable technology has many successful installations in many states in India and in total over 7000 installations of this technology all over the world.

The salient features of the system are as below:

- No gear-box in wind turbines, hence no maintenance.
- Low cut-in wind speed hence generation starts even when wind speed is low. In no wind condition, works on solar energy.
- No skilled manpower required to maintain. Spitzen can provide Annual Maintenance Solutions, if required.
- Easy to install, robust, reliable and user friendly.
- Strong and prompt local support.
- Roof mounted solutions possible with minimum space requirements.
- Auto change over between Renewable system and Grid Supply possible.
- Successful installations running for over 25 years (more than 7000) all over the world.

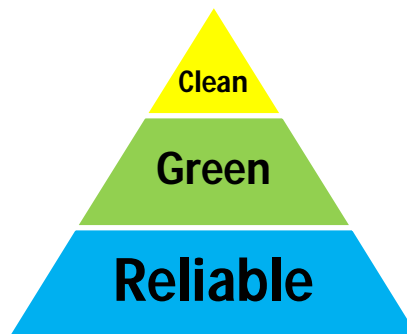

Spitzen Hybrid energy solutions come in 3 configurations:

- 1. 1.4 kW wind turbine + suitable solar back-up (Need based)**
- 2. 5.0 kW wind turbine + suitable solar back-up (Need based)**
- 3. 10.0 kW wind turbine + suitable solar back-up (Need based)**

Spitzen team of experts will assess your needs precisely and suggest the most optimum hybrid solution to suit your requirements so as to ensure your initial investment at the lowest possible level.
